

Hi

Having recently returned from what can only be described as one of the most amazing experience's we have ever had.

This was our first trip to Kiritopib Astro Farm in Namibia and we were a little apprehensive about what to expect.

It was a joy, from the moment of our arrival and setting up, only to find the dreaded rattle of something in my camera that was not quite right, to the elation of resident astronomer Frank, calmly dealing with it, fixing it, and setting us back on track.

This trip will live long in our memory, everything about it was good, its concept, attention to detail, it's professionalism and most of all, making everyone relaxed and ready to enjoy the bounties of this wondrous dark sky site

Thank you for everything, I am planning our next trip already.

Jim and Pat McCafferty
